RE: 1026 request, Tract 9762 – Waterbury 27

Dear Howard,

You have indicated your intention to create a new or modify an existing drainage system or alter non-cropland areas by conducting land clearing activities such as excavation, land leveling or tree removal that has not been previously evaluated by NRCS by checking yes on USDA form AD-1026 to either question 10a or question 10b.

Based on the existing non-certified wetland determination we have on file and on your intended actions that are documented on maps, plans, or drainage worksheets you submitted, **I have concluded that the activity being proposed will not convert a wetland or cause a potential wetland compliance violation. Any deviation from these intended actions will require another USDA form AD-1026.**

It is your responsibility to document and retain records of all drainage activities. This information can be documented on the Drainage Worksheets available at your USDA Service Center. Please note that this response was made relying on resource information that does not meet the quality criteria requirements of a certified wetland determination. There may be additional unidentified wetlands or the wetland boundaries indicated on the existing non-certified determination may be smaller or larger than currently indicated. It is your responsibility to restrict all drainage activity to only that allowable under the wetland compliance provisions.

This determination applies to the 1985 Food Security Act (FSA) as amended. Other federal, state or local permits or restrictions may apply to activities impacting wetlands. It is the responsibility of the participant to obtain other necessary permits. Contact the Army Corps of Engineers for Clean Water Act permits, the Local Government Unit (LGU) for State Wetland Conservation Act permits, and the Minnesota Department of Natural Resources for protected water permits prior to initiating wetland activities. You can contact these agencies using the "Minnesota Combined Project Application Form" available from the LGU.
